**Date of Publication: 2014** 

**Issue No.:** 132

### **Preface**

Economic development is a process in which continuous and ongoing real products, collectively, improv the economic well-being of a country's peoples. Changes in real product are the result of growth in different economic sectors.

In this regard, the ability of industrial sector in the creation of wealth, sustainable economic value-added and demand for its goods and productions cause the role of industry in economic development being more important.

Various models are used in development programs, including the development of models based on the development of business clusters, development of subcontractor network based on the analysis and optimization of the value chain, expanding services related to business development, local economic development and the development of export consortia. One of the most important factors in achieving economic development is relying on regional opportunities. Therefore, in the first step, the economic opportunities of regions and provinces must be identified. Semnan Province with its special geographical position has suitable natural, institutional and human conditions for variety investment in different economic sectors.

In this book because of credit constraints, only 100 of the feasibility studies of the investment plan are presented. In case of more funding more feasibility studies would be available to anyone interested in the subject.

The present investment opportunities are prepared by the Faculty of Economics, Management and Administration science of Semnan University.

At the same time that the efforts of research assistant of Semnan university, Dr. Seyf o Allah Saadodin and his executive partners and all executive in the preparation of these opportunities are being thanked, all experts on development issues are invited to post their comments on this organization in order to promote and advance the book in order to use their beneficial comments and suggestions for future feasibility studies.

# Allah Mohammad Aghaee Head of Organization of Economic Affairs and Finance And

Vice Persident of Investment Service Center of Semnan Province

Project Introduction			
1- Project title: Current Power Plant Servicing	g the Transmission of Water from Finesk Dam to		
Semnan			
2- Sector: Industry and Mine	Sub Sector: Electricity		
3- Products / Services: Production of electricity fr	com water sources		
4- location (address): other			
Free Zone ☐ Economic Special Zone ☐	Industrial Estate□ Main Land*		
5- Project description:			
The topography of the land and the distance of	of the water cooler (fountain) make it necessary		
to have the water pumped from the Finsk River and Kavrd. In order to pump the water this			
distance it is necessary to establish an electric	cal power plant. This power plant can provide		
power not only for the pumping stations but for nearby areas. The water line starts at the			
Finsk Dam and continues to pass Finsk Road, the Parvar two-way road (railway), towards the			
cities of Shahmirzad and Seman. Its length is about 70 km of which approximately 39 km will			
be pumping while the remaining 31 km is sent by gravity.

Project Introduction			
1- Project title: Current Power Plant Servicing the Transmission of Water Canal from Deviation Band			
of Simin Dasht to Garmsar			
2- Sector: Industrial and Mine Sub Sector: Electricity			
3- Products / Services: Production of electricity from power sources			
4- location (address):			
Free Zone $\square$ Economic Special Zone $\square$ Industrial Estate $\square$ Main Land*			
5- Project description:			
Hablerood river provides much-needed drinking water, industry and agriculture. Extracting from saltwater springs near the river, the local water company produces around 150 million cubic meters in a year to separate desalinated water. This can be conducted by the canal and Kalurt near the boundary of Simin dasht and Garmasar (about 37 kilometers). Utilizing the difference in height between these two points (about 470 meters) and volume of sweet water, this extent can be used to produce electricity. Due to the fact that the needed extent of functioning for saving is a water transmission line and the capacity of the canal is 15 cubic meters per second, by functioning the water transmission line with the capacity of about 5 square meters to second, the large capacity of water volume can be transmitted through this project.

Project Introduction			
1- Project title: Stainless Steel Billets			
2- Sector: Industry and Mine Sub Sector: Mineral Industries			
3- Products / Services: Production of stainless steel billets			
4- location (address):			
Free Zone $\square$			
5- Project description:			
Stainless Steel Billets are known for their pure quality and higher standard. For this reason, they are			
used for crafting Billet grilles. Due to their corrosion resistance and strength, they are also used in			
manufacturing grille guards and running boards. Stainless Steel Billets are used widely in building and			
construction purposes, mechanical and electrical engineering works, pumps and auto parts. Stainless			
steel billets are resistant to shock at extreme high or low temperatures.			

steel billets are resistant to shock at extreme high or low temperatures.

Project Introduction	1		
1- Project title: Nyl	on Fabric		
2- Sector: Industry	and Mine	Sub Sector: Tex	xtile Industries
3- Products / Service	es: Production of Fabric		
4- location (address)	:		
Free Zone □	<b>Economic Special Zone</b> □	Industrial Estate*	Main Land□
5- Project description	n:		
While silk, cotton, w	ool, and linen are all derived fi	om plants or animals; ny	ylon is an entirely synthetic
fabric. Nylon fabric	has a low absorbency rate, whi	ch makes it ideal for swi	mwear and sportswear.
Nylon is often combined with other fibers, such PVC, and can be woven into any pattern. Unlike			
polyester and acetate, it can be easily dyed. Nylon's uses are incredibly vast: it can be found in flags,			
toothbrush bristles,	racket strings, machine parts a	and even sutures.

<b>Sub Sector: Building Industries</b>			
from wood			
Industrial Estate* Main Land □			
This product is used in the façade of buildings. Its combination with a variety of composites, façade			
stone and glass attaches to the outer façade of buildings. It can be installed quickly through making a			
profile sub-construction. Its strength is an advantage for using this product in a building. Plastic wood			
can be used on the floor of a yard, garage, pavement, sea wharf and pool corners in a way that they do			
not need cement or stone to make a smooth surface.

Project Introduction	ı		
1- Project title: Bark	perries Sauce		
2- Sector: Industry	and Mine	Sub Sector: Food Ind	lustries
3- Products / Service	s: Production of Sauce from ba	arberries	
4- location (address)	: Other		
Free Zone □	<b>Economic Special Zone</b> □	<b>Industrial Estate</b> □	Main Land*
5- Project description	n:		
Barberry is often u	sed for medicinal purposes l	because its herb contain	s the chemical
barbarize. Barberry has been shown to inhibit the growth of bacteria in test tubes, and may			
help the immune system function better. The aqueous extract of barberry has beneficial			
effects on both the cardiovascular and neural system. As such, it may be useful in the			
treatment of hypertension, rapid heartbeat, and some neuronal disorders, such as epilepsy			
and convulsions. Recent studies suggest that barberry also has antioxidant properties.			
Barberry sauce con	ntains plenty of vitamins, am	ino acid, organic and m	nineral. It is a good
flavoring and raw	material.

4- location (address):			
Free Zone $\square$ Economic Special Zone $\square$	Industrial Estate* Main Land□		
5- Project description:			
All plants contain -mostly in their seeds- fats and oils. Recently, Oil Seed Processing has become a major industry throughout the world economy as food Producers continues to develop more uses for these edible oils. This oil is extracted from grape seeds and is ideal oil for preparing cold and hot foods. Grape seed oil is completely natural and lacks any chemical additives. It is long years that European uses this oil due to its delicious taste and healthy features. On the contrary to other oils, grape seed oil does not burn and smoke. Its taste is similar to butter.

Project Introduction	1			
1- Project title: Sor	ting and Packing Raisin			
2- Sector: Industry	and Mine	Sub Sector: Pac	king Industries	
3- Products / Service	es: Production of Packed Raisin			
4- location (address)	):			
Free Zone 🗆	<b>Economic Special Zone</b> □	Industrial Estate*	Main Land□	
5- Project description	on:			
A raisin is a dried	grape. In agriculture, postha	rvest handling is the st	age of crop production	
immediately following harvest, including cooling, cleaning, sorting and packing. There are				
three types of drying methods: sun drying, shade drying, and mechanical drying. Sun drying				
is an inexpensive process; however, many concerns such as environmental contamination,				
insect infections and microbial deterioration are inevitable and the resulting raisins are often				
of low quality. Additionally, sun drying is a very slow process and may not produce the most				
desirable raisins. On the other hand, mechanical drying is completed in a safer and more				
controlled environment where rapid drying is guaranteed. The main purpose in this project is				
sorting and packin	ng raisin in other to reduce wa	aste and consumption	patterns modified.

4- location (address):				
Free Zone	<b>Economic Special Zone</b> □	Industrial Estate*	Main Land□	
5- Project description:				
Medical specifications	of baked tomatoes are better	than raw tomatoes. For t	that reason, when raw	
tomatoes are consumed, the main part of Lycopene that is not digested will be discharged from the				
body. The act of cooking causes cells of the tomato to be broken, so Lycopene is accessible for the body				
and is absorbed more. Some of the commercial productions of tomatoes are tomato juice, tomato				
sauce, and canned tom	natoes.

Project Introduction			
1- Project title: Exploitation of Dolomite Mine			
2- Sector: Industry and Mine	<b>Sub Sector: Mineral Products</b>		
3- Products / Services: Production of mineral mater	rial of Dolomite		
4- location (address):			
Free Zone □ Economic Special Zone□	Industrial Estate□ Main Land*		
5- Project description:	·		
Dolomite has the following applications: Ferrous or non-ferrous smelting industries, agro- industry			
(where dolomite is used as a fertilizer and soil regulator), production of manganese from sea water,			
Shmooti brick, cement-making, glass-making, building industry (tile-making, laying of concrete, etc.),			
filler in tires, lacquer-making, pigments and ceramic. Dolomite stone is found in the northeastern			
territory of Shahmirzad and can be exploited.

Project Introduction			
1- Project title: Exploitation of Manganese Mine			
2- Sector: Industry and Mine Sub Sector: Mineral products			
3- Products / Services: Exploitation of Manganese from Mine			
4- location (address):			
Free Zone ☐ Economic Special Zone ☐	Industrial Estate ☐ Main Land*		
5- Project description:			
Because of special chemical-physical features, manganese is used as one of the strategic			
metals, which is used in industries of steel, iron-melting, ferroalloy and battery-making.			
Manganese mine is in Kobra, which is located at 129 kilometers of southeast of Semnan. The			
average carat of manganese in the whole mine is 25 percent.
